

75cm Series 7 4 Zone Induction Cooktop

Series 7 | Contemporary

Black Glass

- Instant response and cool-to-touch safety from your spacious cooktop area, with zones designed for different sized pots and pans.
- Child and pet safe – cooktop remains cool to touch until a pot or pan is placed on the surface
 - PowerBoost activates a very high heat, bringing liquid to boil in less than a minute
 - Touch&Slide controls easily control each cook zone

DIMENSIONS

Height	49 mm
Width	750 mm
Depth	530 mm

FEATURES & BENEFITS

Easy Cleaning
The surface around your cookware stays cool when you cook, preventing baked-on spills and making cleaning up a breeze. The durable ceramic cooktop surface just needs a quick wipe after use to maintain its good looks.

Enhanced Features

PowerBoost and GentleHeat deliver either very high or very low heat, fast, for specialised cooking tasks such as searing meat and melting chocolate. An integrated timer keeps you on track.

Superior Efficiency
No heat is wasted during induction cooking because only the cookware is heated, not the cooktop surface. This makes induction cooking more energy-efficient than electric or gas cooktops.

Precise Control
Fisher & Paykel induction cooktops offer extremely accurate, consistent temperature control from very high to very low heats, so you can sear, sauté and temper like a pro.

Instant Response
Go from a boil to a simmer in seconds. Fisher & Paykel TouchandSlide controls react immediately when you adjust the temperature.

Safer Choice
Induction cooktops only start heating your pot or pan once you've placed it on the ceramic surface and stop as soon as you remove it – so you don't have to worry about curious little fingers or leaving an element on.

High-Heat Searing
Fisher & Paykel induction cooktops quickly reach high temperatures, ideal for cooking steak. Cast iron pans are the best choice as they are highly inductive and get really hot, for perfect searing.

SPECIFICATIONS

Accessories (sold separately)

Joiner kit	Part 534731 (required to join two cooktops)
------------	---

Cleaning	
Flat easy clean glass surface	•
Consumption	
Energy rating	Grade 3

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
