# 380L Series 5 Refrigerator Freezer, Ice & Water

Series 5 | Contemporary

Stainless Steel | Right Hinge

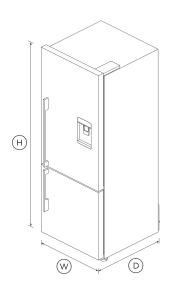

With generous storage and stylish stainless steel design for a timeless look. Perfect for smaller kitchens.

- ActiveSmart technology helps keep food fresher for longer by constantly maintaining the ideal temperature
- · Door water dispenser and internal ice maker
- Spacious bottom freezer with easy-slide internal drawers to separate storage

 Choose which side you'd like your door hinge on to suit your kitchen layout

# **DIMENSIONS**

Height 1715 mm
Width 635 mm
Depth 695 mm

# **FEATURES & BENEFITS**

## **Activesmart Foodcare**

Every time you open your refrigerator, the temperature around your food changes. ActiveSmart foodcare adjusts airflow to create a stable temperature, helping your food stay fresher for longer.

Water Dispenser

The slimline dispenser makes it easy to fill almost any sized jug or vessel with cool filtered water and doesn't take up any storage space in your refrigerator.

#### **Design Quality**

Our refrigerators are designed and built using quality materials. We use real stainless steel, and solid glass for shelving as well as in our wine cabinet doors.

## **Easy Cleaning**

No more permanent dirty marks with our EZKleen feature for stainless steel refrigerators. Anti-fingerprint coating means you simply wipe clean any marks. Spill-safe secure glass shelves easily capture any drips or leaks.

# **Humidity Control**

Your fruit and veges need different environments. The humidity control slides in each storage bin create a perfect microclimate for each, which helps keep them fresher for longer.

## Clever Energy

Your refrigerator adapts to daily use by cooling and defrosting only when needed. This means it uses the energy it needs without compromising on food care.

# **SPECIFICATIONS**

## Accessories (sold separately)

Joiner kit 819264
Water filter replacement 847200 - FWC3

## Capacity

Total gross capacity 414 L
Total net volume 359L

# Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
